

Visual research notebook

Shareable design demonstration. All counts and curves are invented; this document contains no real experimental results.

Synthetic example experiment

How can an experiment stay connected to its results?

Demonstration data only. The curve below is an illustration, not an analysis result.

Reference data

Reference dataset example

Arrange dataset summaries, figures and source-paper citations alongside experiment records.

Example source citation: Li H. et al. (2022). *Fly Cell Atlas: A single-nucleus transcriptomic atlas of the adult fruit fly*. Science 375:eabk2432. [Read paper](#).

The illustration below is synthetic and does not contain Fly Cell Atlas data.

[Enlarge figure](#)

[Open formatted reference report](#)

Saved analysis report. Items labelled "local archive" are not included in this website.

Reference dataset report

This is a **synthetic presentation example**, not a biological finding.

Sources

Li H. et al. (2022). *Fly Cell Atlas: A single-nucleus transcriptomic atlas of the adult fruit fly*. Science 375:eabk2432. [DOI](#).

The source paper illustrates citation formatting only. No source data were downloaded or redistributed here.

Related experiment

[Experiment report](#) demonstrates linked reports, including circular navigation.

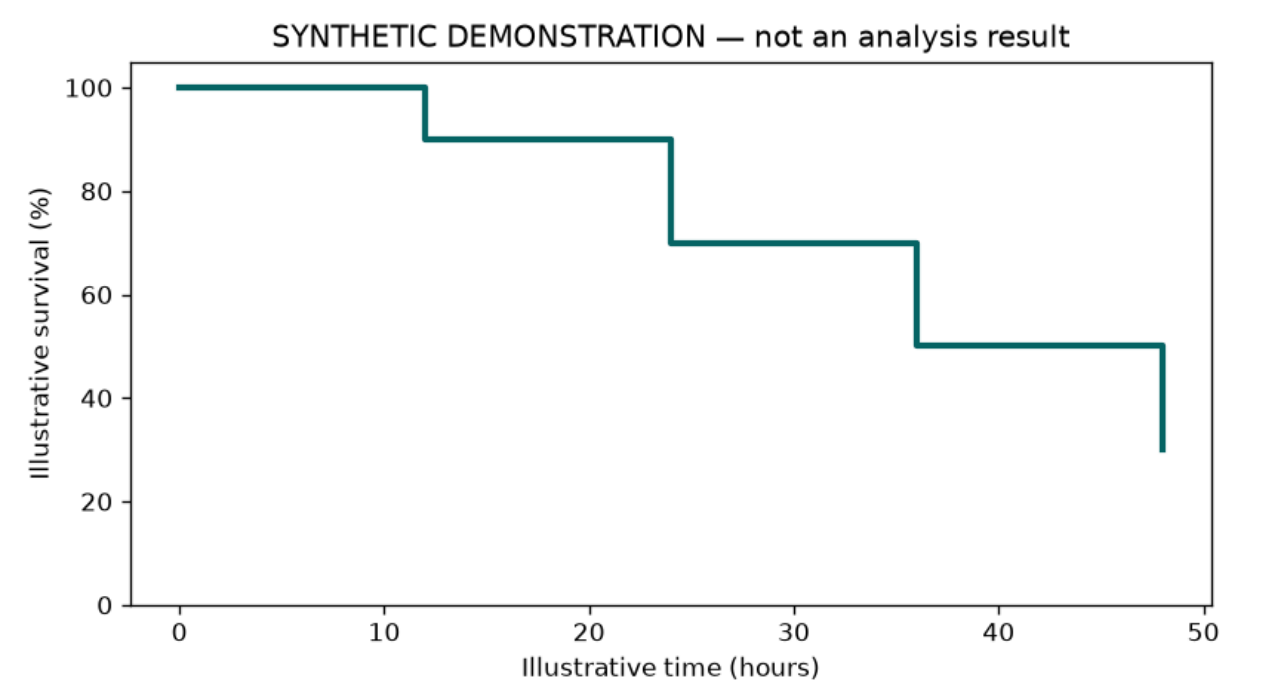

Synthetic experiment report

This example demonstrates **formatted reports**, linked data and an interactive figure viewer. No animals or real experimental measurements are represented.

Conditions

Group	Illustrative count	Status
Synthetic control	10	Demonstration
Synthetic treatment	10	Demonstration

Figure

[Download synthetic counts.](#) [Reference report.](#)

Reproduction

```
python examples/research_dashboard/build.py
```

Raw analysis object (local archive) is intentionally absent, to demonstrate a local-archive label.
